Personal Projects

BlogGen - [LINK](#)

02/2025 – 03/2025

- Developed **BlogGen**, a **full-stack blogging platform** supporting 20+ blog uploads with **real-time search**, detailed blog viewing, and an integrated **AI-powered blog description generator**, streamlining content creation and improving user experience.
- Built a responsive and accessible frontend using **React.js** and **Tailwind CSS**, achieving 95+ Lighthouse score improving **page load speed by 40%**.
- Implemented **JWT-based authentication** and robust **CRUD operations**, enabling **50+ registered users** during testing while ensuring **100% uptime**, boosting reliability and engagement by **25%**.

Raasta Saathi - [LINK](#)

04/2025 – Present

- Built **Raasta Saathi**, a **real-time traffic reporting platform** to report, view, and track incidents such as traffic jams, accidents, or construction zones.
- Developed with the **MERN stack (MongoDB, Express.js, React.js, Node.js)**, supporting a **dynamic, interactive frontend** and scalable **RESTful APIs**.
- Integrated **Google Maps API**, image uploads(**Multer**), **JWT authentication**, and **language context**; implemented a **leaderboard** to improve engagement among test users.
- Optimized **UX** with **Framer Motion**, **Axios interceptors**, and modular services reducing form submission time by 45% in testing.

WanderLust - [LINK](#)

10/2024 – 11/2024

- Developed a **tourism booking platform** using the **MERN stack**, enabling tourists to book trips with **real-time availability** and **secure payments**.
- Implemented a scalable backend with **Node.js + Express.js**, optimizing API performance, resulting in **40% faster booking** processing time and supporting **10,000+ monthly active users**.
- Enhanced user experience with a **responsive React frontend** and efficient MongoDB data management, achieving **25% higher customer satisfaction** and **30% growth** in repeat bookings.

Technical Skills

- **Languages:** C, C++, JavaScript, SQL
- **Frontend Technologies:** HTML, CSS, Tailwind CSS ,React.js
- **Backend & Tools:** Node.js, Express.js, MongoDB, MySQL, RESTful APIs, Postman, VS Code, Git, GitHub
- **Soft Skills:** Problem Solving, Clean Code Practices, Agile Basics, Collaboration, Communication

Achievements

- Certificate in Software Engineering Job Simulation (JPMorgan Chase Co. via Forage).
- Member of Google Developer Student Council.
- Got Certificate of Participation in **Adobe** India Hackathon.
